

Budget Advisory Committee Survey

After soliciting feedback from the community over the past several months, we have created a questionnaire that we hope all budget advisory candidates will complete, to better help ExeterPACT and our community understand where candidates stand on these important issues.

What are your key reasons for running as a candidate for budget advisory committee this year? *

Students must come first. There needs to be a focus on academics above all else. Pet projects and administrative pay raises do not contribute to how children learn. The budget needs to be fiscally responsible. The allocation of money must ensure the most positive academic outcomes for the student.

The School District Budget is always heavily discussed and debated. What changes are necessary to the budget and the budget process if any?

The budget must be achievable with smaller surpluses. The budget needs to be reduced substantially and any excess funds at the end of the year must returned to the taxpayer. Monies spent need to be focused on academics and teachers.

Do you see yourself primarily as a representative of the community or as a representative of the school system? *

Representative of the community

Representative of the school system

If elected, how will you ensure accountability and transparency in the budgeting process?

By testing budget numbers, digging deeply into the numbers and being an independent auditor of the budget.

What particular experiences or skills do you have that makes you the most qualified candidate?

I've worked in an industry where administrators and executives consistently spend more on individual priorities while the people on the ground suffer. Staffing shortages, equipment shortages and equipment failure are a regular occurrence while more and more money is spent annually on raises for upper-level personnel and not on what will produce increased positive outcomes for employees and customers.
